

Chrome/Edge 因應資安調整處理操作手冊

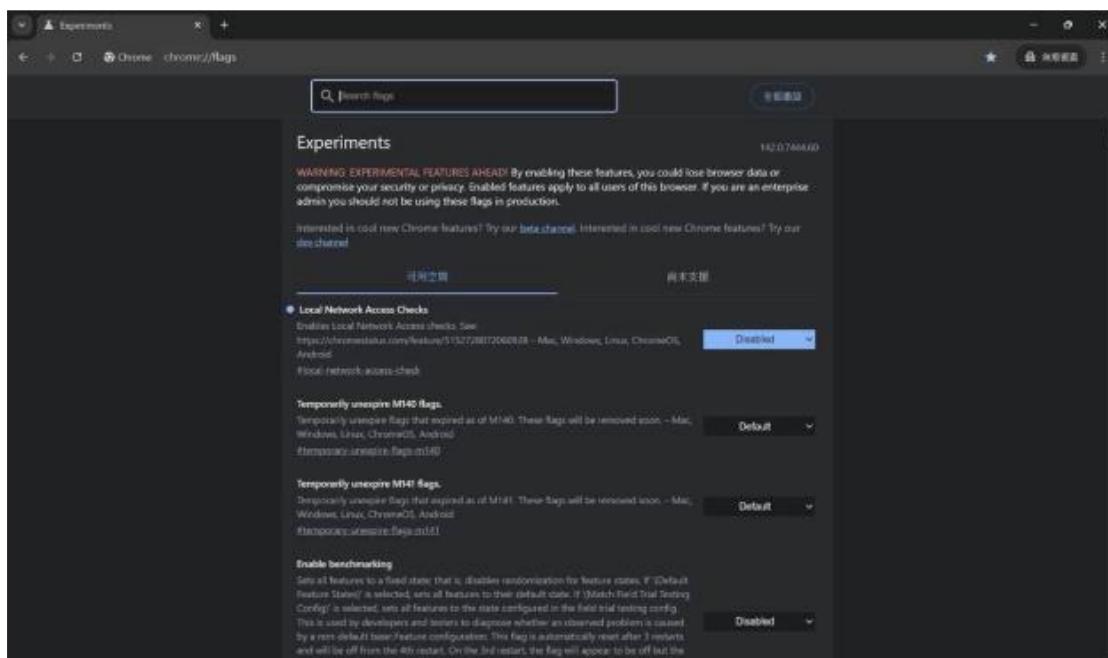

因應Chrome及Edge瀏覽器版本更新， 請依下列說明調整瀏覽器設定信任安控元件，不便之處，敬請見諒。

Chrome

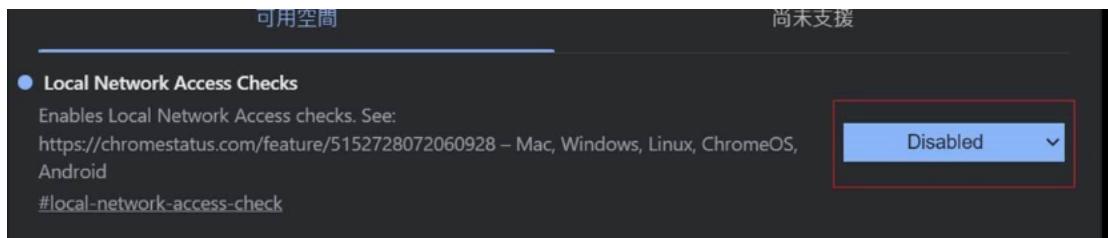

1、在瀏覽導覽列上輸入chrome://flags/

2、在搜尋列輸入Local Network Access Checks

3、將Local Network Access Checks從Default 改為Disabled

Edge

1、在瀏覽導覽列上輸入edge://flags/

2、在搜尋列輸入Local Network Access Checks

A screenshot of the Microsoft Edge settings page. A horizontal navigation bar at the top has "可用" (Available) underlined and "無法使用" (Not Available). Below this, a section titled "Local Network Access Checks" is shown. It contains a description: "Enables Local Network Access checks. See: https://chromestatus.com/feature/5152728072060928 – Mac, Windows, Linux, Android #local-network-access-check". To the right of the description is a dropdown menu currently set to "Default".

3、將 Local Network Access Checks 從 Default 改為 Disabled

A screenshot of the Microsoft Edge settings page, identical to the previous one but with the dropdown menu now set to "Disabled". A note at the bottom of the page says "在您重新啟動 Microsoft Edge 後，變更將會生效。" (Changes will take effect after restarting Microsoft Edge.) and features a blue "重新啟動" (Restart) button.
